-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other. \_\_\_\_.

**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 21, drawn to a process of forming a material with at least two regions of different refractive indices, classified in class 427, subclass 162.
- II. Claim 22, drawn to a material with at least two regions of differing refractive indices, classified in class 385, subclass 129.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made, respectively. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process, such as (1) a process in which one gelable composition is gelled to a first degree, and a second, identical gelable composition is gelled to a second degree either higher than (i.e., more gelled) or lower than (i.e., less gelled) the first degree of gelling; the non-gelled material is extracted or removed; and then the two previously gelled compositions are laminated, bonded, or attached together, or (2) a process in which a first composition is deposited on a substrate in a desired pattern and gelled; a second identical composition is deposited in a pattern between or adjacent to the first gelled composition pattern; the second identical composition pattern only is gelled to a lesser or greater extent than

Art Unit: 1762

the first composition; and the non-gelled material is extracted or removed from the first and/or second gelled compositions.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. John Hayes on 3/1/2004 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement, to be complete, must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
